

I am writing to ask that the radio station K-LOVE not be replaced by an LPFM. This station serves myself and the community by providing family friendly programming - I can leave the station on in my car and never have to worry about what my children are hearing. Other stations do not provide this service to myself or the community - in fact, there are many stations that I will not even allow on in the car due to the language and content (things my 7 year old should not hear!). Please do not allow an LPFM to replace the K-LOVE station that provides my community and my family with music and news that is safe for all ages to hear.
